ABOUT ME

Highly versatile IT Specialist with expertise in Web Applications, Mobile App Development (Flutter & Kotlin), GIS solutions, and digital automation for municipal and enterprise projects. Experienced in designing complete digital ecosystems including GPS based attendance apps, field service reporting tools, vehicle tracking modules, supervisor dashboards, and automated workflow platforms. Skilled in real time database integration, GIS mapping, AI assisted utilities, and converting manual operations into secure, scalable cloud based systems using Firebase and modern development frameworks.

EDUCATION

- Matric in Computer Science
2018–2020
- Intermediate in Computer Science (ICS)
2020–2022
- B.S. in Information Technology (BSIT)
(In Progress)

SKILLS

- React, Vite, Tailwind, Framer Motion
- Flutter (Dart), Android (Kotlin)
- Firebase Firestore, API Integration
- ArcGIS Pro & ArcGIS Online, QGIS
- Kodular Multi-Screen App Development
- Git/GitHub, Netlify, Firebase Hosting
- AI Automation, Excel/CSV Workflows

WORK EXPERIENCE

IT & Admin Staff — Zahran Company, Riyadh 2024–NOW

- Developed internal IT workflows, data management tools, and route automation applications.
- Created app concepts for GPS-locked attendance, labour tracking, and vehicle movement logging.
- Managed municipal datasets, GIS layers, and digital route optimization tasks.

Field & Project Work — Municipality / CWC (REL) Services

- Designed digital field-service applications for complaint logging and photo-evidence verification.
- Developed mobile-friendly driver login flows, vehicle activation tracking, and live map concepts.
- Built automated Excel tools, schedules, and monitoring systems for field operations.

E-Commerce Specialist (Amazon, eBay & Daraz)

- Product research to identify high-demand, low-competition items.
- Managing inventory, variations, pricing, and stock updates.
- Handling order processing, tracking updates, and shipment coordination.

ACHIEVEMENT

- Interactive Portfolio Game (React + Tailwind + Framer Motion)
- Field Service & Complaint Management System (Web App Prototype)
- Supervisor & Foreman Tracking App (Flutter)
